JOURNAL OF MACHINERY MANUFACTURE AND RELIABILITY

	Pages	
	Russian/English	
Working space of a parallel mechanism with four kinematic chains R. E. Bykov, V. A. Glazunov, O. V. Glazunov, and Chan Dyk Hai	10	1
Multigrid algorithm for integrating the Reynolds equations in dynamic problems concerning slip bearings under complex load V. N. Prokop'ev, A. K. Boyarshinova, and E. A. Zadorozhnaya	16	7
Dynamic problems in powerful multimotor drives V. Yu. Chudnovskii	22	13
Failure of a composite perforated plate in flexure V. M. Mirsalimov and F. A. Bakhyshev	28	19
Using ceramics in high-temperature internal-combustion engines Yu. N. Drozdov and T. M. Savinova	38	28
Working life of screw transmission on the basis of wear V. G. Pavlov	44	33
Correcting the settings of an ideal machine tool in order to reproduce a standard surface A. E. Volkov and F. M. Romanchuk	49	38
Thermophysics of plane grinding Ya. I. Soler and D. Yu. Kazimirov	56	45
Neural-network identification algorithm for a dynamic model of a robot manipulator A. I. Diveev, N. A. Severtsev, and A. G. Shklyayev	63	52
Controlling the passage of a rotor through the resonance band by the velocity- gradient method D. A. Tomchin and A. L. Fradkov	66	55
Control of a three-component three-dimensional manipulator with pliable elastic components T. V. Zavrzhina	72	61
Static stress-strain state of components of free-running wedge mechanisms A. A. Goncharov	80	69
Preliminary elastic displacement of an absolute solid at a rough plane I. I. Argatov	88	77
Probabilistic prediction of the remaining life of insulating coatings on gas lines V. I. Kucheryavyi and S. N. Mil'kov	94	83
Ninth International Conference on Automobile Strength and Dynamics A. I. Makarov	105	88
