STEEL IN TRANSLATION

PAGE

Iron Production

Reversible pellet-cooling system at roasting machines. A. A. Butkarev and A. P. Butkarev	1
Pulsating inert-gas injection into hot metal. I. F. Selyanin, A. N. Drobyshev, V. B. Deev, A. V. Feoktistov, and A. I. Kutsenko	4
Computer systems to support decision making in blast-furnace management. N. A. Spirin, S. V. Kazantsev, A. I. Perminov, and K. A. Shchipanov ...	6
Oxidation rate of hot-briquetted iron. L. N. Krakht, T. V. Nikitchenko, and A. S. Timofeeva	9

Theory of Metallurgical Processes

Saturated vapor pressure and activity of chromium in the Fe-Cr-Si-C system. V. A. Popov, L. Sh. Tsemekhman, B. P. Burylev, V. E. Kritskii, and V. V. Barsegyan	11
--	----

Metallurgy of Steel and Ferroalloys

Improving the smelting of sheet steel for the auto industry. Yu. F. Sukhanov, A. I. Dagman, and V. N. Khrebin	16
Improving injection systems in casting ladles. D. A. Livshits, A. L. Podkorytov, V. I. Antonov, and V. P. Sosnin	20
Improving ladle treatment of steel in electrosmelting shop 1 at the Belorussian Metallurgical Plant. V. Yu. Gunenkov, V. A. Tishchenko, V. V. Pivtsaev, and Yu. V. Karpovich	22
Hydrodynamic interaction of oxygen jet with converter bath. A. V. Mokrinskii, E. V. Protopopov, and A. G. Chernyatevich	25
Spontaneous boiling in deep vacuum decarburization. D. I. Borodin, V. A. Fomenko, and I. A. Petushkov	33

Pressure Treatment of Metals

Improving the production of corrosion-resistant steel pipe on an 8-16" rolling unit with pilger mills. A. V. Saf yanov, L. I. Lapin, K. N. Nikitin, N. G. Danovskii, and A. Yu. Matyushin	38
Ultrasonic grinding of hard-alloy draw plates. V. G. Dampilon and E. O. Gusarev	43
Improving hydraulic drives in counterflexure and roller-balancing system. A. M. Chumikov and A. F. Cheryapkin	47
Influence of contact friction on the deformed state and forces during hot rolling in box grooves. S. V. Ershov	49

Structure and Properties of Metals and Alloys

Evolution of microstructure and texture in the production of isotropic electrical-engineering steel. A. E. Cheglov, A. A. Zaveryukha, and N. Yu. Slyusar	52
--	----

Influence of impurities and rolling parameters on the mechanical properties of Fe-Si alloys. D. N. Aleshin, A. M. Glezer, V. V. Kovalenko, and V. E. Gromov	60
Evolution of the dislocational substructures in 08Kh18N10T steel in multicyclic fatigue. S. V. Vorob'ev, Yu. F. Ivanov, A. V. Gromova, S. V. Konovalov, and E. V. Kozlov	62
Metallographic investigation of decarburized surface layer of rails. M. V. Temlyantsev, A. Yu. Syusyukin, and N. V. Temlyantsev	65

Ecology and Resource Conservation

Nodular deposits on bag-filter fabrics in industrial dust removal. V. I. Kazyuta	69
--	----

Thermal Aspects of Metallurgy

Evaluating coal for converter steel production. E. P. Volynkina and Yu. A. Seleznev	72
---	----
