STEEL IN TRANSLATION

PAGE

Iron Production

Improving blast-furnace smelting at Zapadno-Sibirskii Metallurgicheskii Kombinat Joint Stock Company. V. A. Dolinskii, L. D. Nikitin, A. F. Avtsinov, and S. F. Bugaev	1
Simulation of slag processes in blast-furnace smelting. N. A. Spirin, O. P. Onorin, V. Yu. Rybolovlev, A. I. Perminov, and K. A. Shchipanov	7
More effective use of coal-dust fuel in blast furnaces. V. M. Parshakov	12

Metallurgy of Steel and Ferroalloys

Electrosmelting of carbon steel in large furnaces using hot-briquetted iron. E. S. Timofeev and A. S. Timofeeva	23
Improving the industrial desulfurization of hot metal. D. V. Gulyga	25
Technological and energy aspects of ladle-furnace operation. D. A. Dyudkin.....	33
Reconstructing continuous-casting machines for the production of high-quality tube-steel billet. V. A. Piksaev	38
Protective coatings for vacuum-chamber and ladle linings. S. I. Borovik, T. N. Ivanova, V. A. Zaitsev, N. L. Mironenko, and M. Kh. Shaimov.....	40
Processing converter slags, with the extraction of vanadium and manganese. S. K. Nosov, V. G. Mizin, and T. P. Sirina	42
Modernization of continuous-casting machines for round billet. V. V. Masnyi, I. V. Neklyudov, A. A. Pecheritsa, V. B. Gankin, and A. V. Shapiro	49

Pressure Treatment of Metal

Deformed state of metal in double slotted pass. A. O. Sadyrin and V. N. Peretyat'ko	52
Improving the production of hexahedral casing pipe for the storage of spent nuclear fuel. A. V. Saf'yanov, K. N. Nikitin, V. G. Dukmasov, V. P. Borisov, and L. I. Lapin	56

Structure and Properties of Metals and Alloys

Gradient structural-phase states in low-carbon steel reinforcement. Yu. F. Ivanov, A. B. Yur'ev, M. M. Morozov, A. V. Ivliev, and V. E. Gromov	61
Quality of transeutectoidal steel rail microalloyed with vanadium and nitrogen. V. I. Vorozhishchev, V. V. Pavlov, E. A. Shur, L. V. Korneva, and N. A. Kozyrev	65
Formation of structure-phase states in low-carbon steel reinforcement on thermal strengthening. A. B. Yur'ev	71

Improving the quality of EP742-ID alloy disks. A. I. Baturin, A. S. Perevozov, and V. A. Maizengel'ter	73
Production of harder grinding-mill balls. Yu. P. Petrenko, V. V. Kasatkin, V. F. Myunkh, and A. A. Skorokhodov	75
Mechanism of internal-crack formation in slabs. A. V. Kuklev, V. V. Sosnin, V. V. Vinogradov, and V. A. Pozdnyakov	77
New methods of applying diffusional coatings based on zinc and aluminum in a fluidized bed. Yu. A. Balandin, A. S. Kolpakov, and E. V. Zharkov	84
