STRUCTURAL MECHANICS AND STRENGTH OF FLIGHT VEHICLES

Model of three-dimensional main rotor motion of vertical takeoff and landing aircraft. A.L. Bykov	3	1
Influence of air compressibility on critical angular velocities of flutter of the main rotor with an elastic hub. S.A. Mikhailov, E.I. Nikolayev, and N.A. Shilova	8	9
Fluctuations of catastrophic variation in the empennage shape. V.A. Pavlov and M.K. Tleulinov	13	17

FLIGHT DYNAMICS AND CONTROL OF FLIGHT VEHICLES

Model problem of ricochet space vehicle return. V.A. Afanas'ev, G.L. Degtyarev, A.S. Meshchanov, and T.K. Sirazetdinov	16	22
Fuzzy controller to control a multistructured object. A.V. Eliseyev	20	28
Fuel saving on passenger-transport airplanes while maintaining flight level. K.V. Ustinov	26	37

AIRCRAFT AND ROCKET ENGINE DESIGN AND DEVELOPMENT

Modal analysis of dynamic rotor systems. A.V. Ivanov and M.K. Leont'ev	31	45
Application of pulse detonation engines in aerospace engineering. Yu.V. Suslov, I.V. Garanin, and V.G. Kul'chikhin	36	54

AIRCRAFT AND ROCKET ENGINE THEORY

Heat exchange and hydrodynamics of turbulent flows under conditions of hydrodynamic nonstationarity. V.M. Krayev	39	57
Theory of turbulent fluid motion. A.A. Sergienko	43	63

AIRCRAFT PRODUCTION TECHNOLOGIES

Application of thermal barrier coatings in contemporary gas turbines. II. Bond coat layer. A.M. Abusdel', T.A. Il'inkova, and A.N. Lunev	47	69
Optimal control of through induction heating of large-scale discontinuous bodies. V.I. Ivanov.	51	75
Study of a constrained bending process in profiling thin-sheet blanks. I.M. Kolganov, P.N. Kuprin, and P.Yu. Pakshin	55	81
Computer-simulated design of tool electrodes for use in the electrochemical machining of GTE compressor blades. A.G. Firsov, A.A. Sredin, and A.Kh. Karimov	59	87
Evaluation of influence of processing parameter instability on the accuracy of folded cores. V.I. Khaliulin, A.A. Razdaibedin, and D.G. Menyashkin	63	94

TECHNICAL NOTES

STRUCTURAL MECHANICS AND STRENGTH OF FLIGHT VEHICLES

Application of the Timoshenko-type shell theory to calculating thick shells. F.S. Khairullin67 102

FLIGHT DYNAMICS AND CONTROL OF FLIGHT VEHICLES

Use of ricocheting and pitch-up effects to increase the missile flight range. V.Ya. Khil'kevich
and L.S. Yanovskii.....70 106

AIRCRAFT AND ROCKET ENGINE DESIGN AND DEVELOPMENT

Influence of air-evaporation cooling on the efficiency of air-to-liquid heat exchanger
operation. A.V. Chichindayev73 110

AIRCRAFT AND ROCKET ENGINE THEORY

Relationship between the total losses in a turbine cascade and the efficiency of curtain cooling
in its end wall. V.V. Lebedev76 114
Determination of GTE unit dynamic behavior in vibration signal spectrum. A.N. Tyrsin78 118
