JOURNAL OF FRICTION AND WEAR

	PAGES	
	RUSSIAN	ENGLISH
Tribology: how a word was coined 40 years ago. H. Peter Jost.....	129	1
Rolling friction of elastic cylinder as a result of plastic deformation of surface asperities. E.A. Bulanov.....	132	4
Initiating of thermal cracking of materials by frictional heating. A. Evtushenko and M. Kutsei.....	136	9
Determination of tribological characteristics of face hypoid gear pair. O.L. Podgaevskii.....	143	17
Analysys of efficiency of sliding bearings with thin multi-layer antifriction coating and misaligned shaft and bushing axes. R.V. Sorokatyi.....	155	29
Method of experimental estimation of parameters of law of material wear in rolling tests. M.N. Dobychin, A.V. Morozov, and O.N. Ozerskii.....	165	38
Trends in tribodiagnostics. L.V. Markova.....	175	47
Improvement of design of face seals of oil-transfer pumps based on analysis of hydromechanical and thermal processes. Z.N. Ovchar, Yu.K. Mashkov, and N.A. Prokudina.....	185	56
Optimization of friction units of machines with consideration of information ambiguity in initial data. L.I. Evelson and E.A. Pamfilov.....	191	62
Formation of wear-resistant surface structures and their damage mechanism in friction with lubricant modified by ultradispersed diamond-graphite additives. Part 2. Damage model. P.A. Vityaz, V.I. Zhornik, V.A. Kukareko, and A.I. Kamko.....	196	67
Wear-resistant coatings with ultradispersed oxide-ceramic filler. N.P. Barykin, A.Kh. Valeeva, and I.Sh. Valeev.....	201	71
Properties and prospects of usage of carbon nanostructures in powder composite materials for tribological applications. V.A. Kovtun and V.N. Pasovets.....	206	76
Friction of heterogeneous antifriction graphite-containing iron-based materials. E.P. Borisov, Yu.I. Serikov, V.G. Rodnenkov, A.V. Borodin, and B.I. Kupchinov.....	216	84
Method of accelerated determination of wear resistance of ceramic materials. V.N. Dynkovich and A.P. Pavlenko.....	221	88
Effect of chemical structure of coordination compounds of transient metals on lubricating characteristics of oils. G.G. Chigareno, A.G. Ponomarenko, A.S. Burlov, I.S. Vasil'chenko, A.I. Uraev, and A.D. Garnovskii.....	225	92
Effect of highly dispersed organomineral fillers on temperature characteristics of lubricating compositions. E.N. Volnyanko, E.F. Kudina, T.G. Chmykhova, and V.A. Smurugov.....	232	98
