JOURNAL OF FRICTION AND WEAR

	PAGES	
	RUSSIAN/ENGLISH	
Nonlinear contact problem with wear for Winkler foundation (constant contact area) I.A. Soldatenkov.....	245	1
Simplified model of car wheel rolling. D.A. Chernous and S.B. Anfinogenov	257	13
Minimization of stress state of disc fitted on rotating shaft. V.M. Mirsalimov.....	264	20
Thermoelastohydrodynamic calculation of heavy-duty sliding bearings. I.A. Toder, E.S. Krendelev, and G.I. Tarabaev.....	269	25
Solution of contact heating problem with account for heat transfer between the friction members. A.L. Nosko and A.P. Nosko	279	35
Calculation of optimal contact surface area of frictional facings in automotive brakes. V.A. Balakin, V.P. Sergienko, A.A. Ivanov, and V.P. Chaus	285	41
Aircraft brakes with carbon frictional discs. E.I. Kramarenko, V.V. Kulakov, A.M. Kenigfest, S.A. Lisovskii, and V.V. Mozalev	290	46
Tribological characteristics of steel (iron) — Foleox system. J. Padgurskas, R. Rukuiza, H. Cesiuolis, A. Amulevičius, A. Daugvila, R. Davidonis, and Č. Sipavičius.....	299	54
Fractal analysis of friction surfaces of diamond-like coatings. O.S. Kiselevskii and V.P. Kazachenko.....	304	59
Technology of improving wear resistance of materials experiencing chipping in friction. Ya.S. Semenov and M.P. Lebedev.....	309	63
Improvement of mechanical and tribological properties of polymer composite materials by ultrasonic vibration energy. Yu.K. Mashkov, D.A. Negrov, Z.N. Ovchar, and V.S. Zjablikov.....	313	67
Organosilicate coolant lubricants: experience of development and prospects of application (A Review). I.I. Zlotnikov and Yu.M. Pleskachevskii	318	71
Tribological properties of ferrofluid. A. Miszczak.....	330	81
Interrelations between tribological and rheological characteristics of aqueous solutions of discotic mesogenes. E.V. Berezina, V.A. Godlevskii, and N.V. Usoltseva.....	337	87
Improvement of operational stability and reliability of frictional shock absorbers. A.L. Golubenko and L.A. Gubacheva.....	343	93
