KINEMATICS AND PHYSICS OF CELESTIAL BODIES

PAGES
RUSSIAN/ENGLISH

Solar Physics

Dynamo parameters of the solar convection zone. V. N. Kryvodubs'kyi	3	1
A possible mechanism for the excitement of torsional sunspot oscillations. O. S. Gopasyuk and S. I. Gopasyuk	29	21
On the line tying of coronal loops. Yu. T. Tsap	40	28

Physics of Stars and Interstellar Medium

Close binary systems in regions of OB associations. IV. V698 Cygni in Cyg OB3. M. M. Zakirov and M. U. Eshankulova	49	35
---	----	----

Space Physics

Influence of temperature irregularities on the generation of kinetic Alfvén waves in the Earth's magnetosphere. P. P. Malovichko, A. N. Kryshchal, and A. K. Yukhimuk	58	41
Flute and incompressible perturbations in the Earth's inner magnetosphere. A. S. Parnovskii and O. K. Cheremnykh	65	46

Mathematical Processing of Astronomical Data

Automatic normalization of stellar echelle spectra to the continuum. D. A. Lyashko	76	56
---	----	----
