KINEMATICS AND PHYSICS OF CELESTIAL BODIES

PAGES
RUSSIAN/ENGLISH

Space Physics

Anisotropy of galactic cosmic rays. Yu. I. Fedorov	83	61
Iterative method for solving boundary-value problems in the theory of cosmic ray propagation. B. A. Shakhov and Yu. L. Kolesnik	101	75

Extragalactic Astronomy

Perturbations of ion and electron number densities at the cosmological recombination epoch. B. S. Novosyadlyi	109	81
Observational signatures of relativistic shock breakout at the surface of hypernova star. B. I. Hnatyk and V. V. Marchenko	125	94

Dynamics and Physics of Bodies of the Solar System

New determination of monochromatic methane absorption coefficients with regard to the thermal conditions in the atmospheres of giant planets. III. Uranus and Neptune. A. V. Morozhenko	138	106
Ultralow frequency modulation of the S-component in the Jovian decametric radio emission. A. V. Arkhipov	154	120
