KINEMATICS AND PHYSICS OF CELESTIAL BODIES

PAGES
RUSSIAN/ENGLISH

Space Physics

- Effective cross-section of the scattering from the sporadic-*E* irregularities induced by atmospheric turbulence. Yu. V. Kyz'yurov 163 113

Solar Physics

- Origin of extremely asymmetric Stokes *V* profiles in an inhomogeneous atmosphere. V. A. Sheminova 172 120
- Diagnostics of the internal gravity waves in the solar photosphere. M. I. Stodilka 197 137
- Torsional oscillations of sunspot umbrae. O. S. Gopasyuk 209 144

Extragalactic Astronomy

- Triplets of galaxies in the local supercluster. 2. Virial and total masses. V. E. Karachentseva, O. V. Mel'nik, I. B. Vavilova, and D. I. Makarov 217 150

Notes

- Some results of photometric observations of the asteroids 1090 Sumida, 2001 US16, 2003 YT1, 1999 LF6, and 2004 LJ1. O. M. Geraschenko and V. O. Lokot' 231 160
- Internet robot as a fast indicator of solar activity and geomagnetic storms. G. P. Marchenko and Yu. I. Velikodskii 236 163
