2005

MOLECULAR GENETICS, MICROBIOLOGY, AND VIROLOGY

| | PAGE |
|---|------|
| <u>Review Articles</u> | |
| Molecular biological approaches to the diagnosis and intraspecies typing of the causative agents of glanders and melioidosis. V. A. Antonov and V. I. Ilyukhin | 1 |
| Possible mechanisms of the implementation of the toxic potential of liposaccharides of pathogenic bacteria. N. V. Pavlovich and V. I. Tynyanova | 10 |
| <u>Experimental Articles</u> | |
| Comparative analysis of electrophoregrams of total cell proteins of pathogenic <i>Burkholderia</i> . A. A. Budchenko, V. I. Ilyukhin, and D. V. Viktorov | 16 |
| Construction of the recombinant antigen pp65 of human cytomegalovirus and investigation of its immunochemical properties. I. M. Susloparov, M. A. Susloparov, S. N. Ivchenko, V. M. Blinov, D. V. Saraev, N. M. Makhova, N. V. Noskova, M. P. Grishaev, M. A. Smerdova, and E. Yu. Kosova | 24 |
| Antiviral activity of membranotropic compounds modified with adamantane and norbornene pharmacophores against various strains of HIV-1. Ya. Yu. Kiseleva, N. G. Perminova, O. A. Plyasunova, D. I. Timofeev, A. V. Serbin, L. I. Kas'yan, Yu. A. Egorov, T. S. Grebinik, and I. V. Timofeev | 31 |
| <u>Brief Communications</u> | |
| Stimulation of bacterial growth by the cytokine TNF α in an in vitro system. A. S. Tomova, A. A. Terekhov, Yu. M. Romanova, A. L. Gintsburg, and O. V. Tikhonova | 37 |
