MOLECULAR GENETICS, MICROBIOLOGY, AND VIROLOGY

PAGE

Experimental Articles

- Influence of a recombinant plasmid carrying cloned genes of the cholera prophages CTX and RS1 on the expression of virulence and immunogenicity genes in the cholera pathogen. N. I. Smirnova, S. P. Zadnova, and A. V. Toporkov 1
- Study of the *scaAB* gene of pathogenic group B streptococci, which codes for a protein involved in adhesion and aggregation processes. E. I. Vorob'eva, O. V. Vorob'eva, and A. N. Suvorov 10
- Study of the polymorphism of *mec* DNA in methycillin-resistant strains of *Staphylococcus aureus* isolated at hospitals in different regions of Russia. O. A. Dmitrenko, I. A. Shaginyan, and A. L. Gintsburg 15
- Genetic variants of *Borrelia afzelii* — one of the pathogens of *Ixodes* tick-borne borrelioses. I. A. Fadeeva, V. V. Nefedova, E. I. Korenberg, and N. B. Gorelova 24
- Differentiation of tuberculosis mycobacteria of the W-Beijing family, widespread on the territory of the Russian Federation, on the basis of VNTR typing. O. V. Surikova, D. V. Voitikh, M. L. Filippenko, G. A. Kuz'micheva, S. I. Tat'kov, I. V. Mokrousov, and O. V. Narvskaya 31
