Experimental Articles

Enzymes of nitrogen assimilation in <i>Bacillus subtilis</i> mutants with hyperproduction of riboflavin. V. N. Gershanovich, T. N. Bol'shakova, O. Yu. Dobrynina, Z. M. Galushkina, A. Ya. Kukanova, and A. I. Stepanov	1
Production of the soluble form of the human tumor necrosis factor receptor by expression in <i>Drosophila</i> cells. E. V. Surovtseva, N. V. Anikeeva, Yu. K. Sikulev, and A. B. Shevelev	9
The role of the promoter and leader sequence of extracellular ribonuclease of <i>Bacillus amyloliquefaciens</i> in the regulation of enzyme biosynthesis. L. V. Znamenskaya, A. R. Kayumov, M. A. Kharitonova, and V. I. Vershinina	16
Anthrax: early steps in the intracellular stage of development of infection. I. V. Bakhteeva, G. M. Titareva, T. B. Kravchenko, R. I. Mironova, and A. N. Noskov	24
Molecular genotyping of strains of <i>Mycobacterium tuberculosis</i> circulating in Central Russia: effectiveness of spoligotyping and VNTR-MIRU. V. V. Nikolaevskii, Ya. M. Balabanova, T. Brown, F. A. Drobniewski, and I. M. Fedorin	33
