## MECHANICS OF SOLIDS

	Russian page	English page
Deformations of a planet containing a moving internal core in the gravitational field of a central body and a satellite. <b>A. V. Shatina</b> .....	3	1
Invariant representation of the potential interaction between a rigid body with nonuniform electromagnetic field. <b>Yu. M. Urman</b> .....	13	8
Motion of a rigid body with a single fixed point in the Steklov case. <b>A. P. Markeev</b> .....	20	14
Shock isolator of maximum robustness with respect to the change in the mass of the object to be protected. <b>V. V. Kulagin and V. A. Prourzin</b> .....	34	26
A review of contact algorithms. <b>N. G. Bourago and V. N. Kukudzhanov</b> .....	45	35
Modeling of the change of the internal structure and stress state in a material subjected to high thermal loads on the basis of the particle dynamics method. <b>A. M. Krivtsov, V. P. Myasnikov</b> .....	88	72
The propagation of unsteady elastic waves in homogeneous porous media. <b>T. I. Maslikova and V. S. Polenov</b> .....	104	86
Inertial and dissipative properties of a porous medium saturated with viscous fluid. <b>L. D. Akulenko and S. V. Nesterov</b> .....	109	90
Relations of the theory of anisotropic perfectly plastic media. <b>B. G. Mironov</b> .....	120	99
Direct numerical method for solving singular integral equations of the first kind with generalized kernels. <b>A. V. Andreev</b> .....	126	104
Local buckling of plates and shallow shells on an elastic foundation. <b>P. E. Tovstik</b> .....	147	120
Effect of meridional loads on the natural vibrations and dynamic stability of a nearly-cylindrical shell of revolution. <b>S. N. Kukudzhanov</b> .....	161	132
Stability and postcritical behavior of a multilink system of rigid bodies subjected to nonpotential loading. <b>V. V. Bolotin, A. V. Petrovskii, and V. P. Radin</b> .....	174	142
