MECHANICS OF SOLIDS

	Russian page	English page
Padé expansions in the two-dimensional model of Coulomb friction. V. Ph. Zhuravlev and A. A. Kireenkov	3	1
Equilibrium conditions for a rigid body on a rough plane in the case of axially symmetric distribution of normal pressures. I. I. Argatov	15	11
The motion of a rotating body in a resisting medium. V. S. Aslanov	27	21
The invariance and optimal stabilization of the pursuing motion of a manipulator. I. A. Mukhametzyanov	40	33
Time-optimal control of two components of the state vector of a linear mechanical system. V. A. Svetlitskii	47	39
An axisymmetric contact problem for half-space inhomogeneous in depth. V. M. Alexandrov and V. V. Klindukhov	55	46
Inverse problems of inelastic deformation of inhomogeneous media. I. Yu. Tsvlodub	61	51
The propagation of elastic waves in a right-angled wedge after facet impact on a fixed plane obstacle. N. A. Veklich	70	58
An analytical method for solving dynamic problems for layered media with inclusions. O. D. Pryakhina and A. V. Smirnova	87	71
On a statically indeterminate state of a perfectly plastic layer compressed between rough rigid surfaces. L. A. Maksimova	98	80
A generalization of Shield's self-similar solutions of the axially symmetric problem of plasticity. Yu. N. Bakhareva and Yu. N. Radaev	104	86
A model of a viscoplastic body taking into account the loading history. V. M. Greshnov ...	117	97
The calculation of the Lode parameters when processing the results of experiments. K. F. Komkov	126	104
The shapes of a rheonomic bar in a gravity field. K. I. Romanov	136	113
The far-range asymptotic behavior of the stress field in the problem of crack growth in a creeping damaged medium. V. I. Astaf'ev and L. V. Stepanova	145	121
A limiting state of orthotropic ice plates. V. M. Nikireev	155	129
Elastoplastic transverse bending of profiled plates reinforced along the principal stress and strain directions. Yu. V. Nemirovskii and A. P. Yankovskii	160	133
Dynamic behavior of thin-walled electroelastic systems. E. P. Kligman, V. P. Matveenko and N. A. Yurlova	179	149
