MECHANICS OF SOLIDS

	Russian page	English page
A method of electronic speckle pattern interferometry for solving some inverse problems of mechanics of elastic bodies. R. V. Goldstein, V. M. Kozintsev, A. V. Podlesnykh, A. L. Popov, and D. A. Chelyubeev	5	1
In-plane problem for P-wave propagation through elastic solids with a periodic array of cracks: oblique incidence. Edoardo Scarpetta and Vincenzo Tibullo	15	10
Interaction of a transient longitudinal shear wave with a thin rigid partially debonded inclusion. A. P. Moiseenok and V. G. Popov	27	19
Flexural edge waves in laminated anisotropic media. D. D. Zakharov	36	26
Vibrations and dynamic stability of nearly-cylindrical shells of revolution subjected to normal pressure and meridional loads. S. N. Kukudzhyanov	48	36
Vibrations of strings and beams in an inhomogeneous elastic medium. L. D. Akulenko and S. V. Nesterov	60	47
Non-steady vibrations of impulsively loaded rods. V. A. Svetlitskii	69	54
Stability of the equilibrium state of an axially compressed closed circular cylindrical shell with respect to small perturbations. G. I. Kolosov	77	60
Stability of a non-potentially loaded cantilever beam restrained by an elastic spring. V. V. Bolotin, V. P. Radin, V. P. Chirkov, and A. V. Shchugorev	84	65
Stability optimization of a cantilever beam subjected to a non-conservative compressive force. V. A. Postnov and G. A. Tumashik	93	72
On the instability of a free elastic beam with non-linear internal viscosity under a follower force. S. A. Agafonov and G. A. Shcheglov	104	81
Some nonconventional buckling problems for a beam under transverse loads. D. A. Gulyaev, A. A. Zagordan, and V. I. Shalashilin	111	87
On the 3D formulation for the Novozhilov criterion for quasi-static fracture. S. A. Nazarov ..	118	93
Application of probabilistic methods of fracture mechanics to the risk analysis of violation of safety criteria for a reactor facility. V. A. Grigor'ev	128	101
On the description of coupled processes of deformation and damage accumulation in structures subjected to intensive loads. O. V. Trifonov	131	113
Elastohydrodynamic lubrication of a point contact subject to dynamic loading. M. Ya. Panovko	154	123
Stability of regular and chaotic vibration modes in systems with several equilibrium states. L. P. Dzubak, G. V. Manucharyan, Yu. V. Mikhlin, and T. V. Shmatko	168	134
Analysis of stochastic vibroimpact systems with inelastic impacts. L. L. Song and D. V. Iourtchenko	180	146
