MECHANICS OF SOLIDS

	Russian page	English page
Construction of a Set of Equations for Controllers Ensuring Quasi-Invariant Stabilization of a Prescribed Motion of a Pursuing Body. I. A. Mukhametzyanov	3	1
A Problem of Gyroscopic Stabilization of Mechanical Systems. G. G. Denisov and V. V. Novikov	11	8
Perturbation Torque in a Pendulum Floated Accelerometer on a Vibrating Base in The Case of Nonsymmetric Flow of a Fluid Through End Faces. S. A. Antsiferov, D. V. Kondratov, and L. I. Mogilevich	16	12
On the Global Parametrizations of a Group of 3D Rotations. S. E. Perelyaev	30	23
On the Problem of Three-Dimensional Deceleration of a Rigid Body in a Resistant Medium. M. V. Shamolin	45	34
On the Motion of Rigid Particles in Wave Fields. L. E. Ukrainskii	58	45
An Alternative Method in Elasticity: Boundary Condition Splitting. K. F. Chernykh	71	55
Contact Problem for a Conical Valve. V. M. Alexandrov, D. A. Pozharskii, and V. V. Trepachev	89	69
Limiting Performance Analysis of Multilayered Heat-Stabilizing Structures. E. L. Gusev ...	96	75
Ring-Cylinder Thermoelastic Contact Interaction with Nonstationary Frictional Heat Generation. P. P. Krasnyuk	103	81
Laser Pulse Time Structure Effect on Temperature and Thermal Stress Distribution in a Massive Elastic Body. A. A. Evtushenko, E. G. Ivanyk, and K. Rozhnyakovskii ...	118	93
Determination of an Elastoplastic Process on the Basis of the Resultant Unloaded State. A. A. Burenin and L. V. Kovtanyuk	130	103
Plastic State and Texture Evolution of a Metal Sheet. Part 2: Numerical Analysis of Deformation Processes in Polycrystal Systems. F. F. Satdarova	135	107
Construction of Constitutive Relations of Viscoelasticity and Creep under Unsteady-State and Complex Loadings. V. A. Peleshko	144	114
A Method for the Analysis of Two-Layer Shells in the Absence of Direct Contact Between the Layers. F. S. Khairullin	166	132
Inverse Periodic Problem of Bending for a Plate with Elastic Inclusions. V. M. Mirsalimov .	171	137
Aerodynamic Control of Vibrations of Structural Elements. V. I. Morozov and V. V. Ovchinnikov	180	144
