## MECHANICS OF SOLIDS

	Russian page	English page
Magnetic suspension in an alternating current field. <b>M. S. Artem'eva and D. Yu. Skubov</b> . . .	3	1
Regular integral equations for the second boundary value problem in two-dimensional anisotropic elasticity. <b>Yu. A. Bogan</b> . . . . .	17	13
The influence of the scale factor on the elastic moduli of a 3D nanocrystal. <b>O. S. Loboda and A. M. Krivtsov</b> . . . . .	27	20
Elastic properties of graphite rods and multiwalled carbon nanotubes (torsion and extension). <b>V. A. Gorodtsov and D. S. Lisovenko</b> . . . . .	42	33
Discrete-continuous model of a nanotube. <b>R. V. Goldstein and A. V. Chentsov</b> . . . . .	57	45
Determination of elastic moduli of nanostructures: theoretical estimates and experimental techniques. <b>E. A. Ivanova, N. F. Morozov, B. N. Semenov, and A. D. Firsova</b> . . . . .	75	60
Submicrosecond strength of materials. <b>G. I. Kanel, S. V. Razorenov, and V. E. Fortov</b> . . . . .	86	69
The Effect of rheological fracture elements in modeling wave motions in a rod of complex structure. <b>D. A. Indeitsev, V. N. Naumov, and E. I. Prokuratova</b> . . . . .	112	90
Evolutionary constitutive relations for finite viscoelastic strains. <b>R. S. Novokshanov and A. A. Rogovoi</b> . . . . .	122	98
Plastic instability of thin-walled cylindrical shells. <b>V. L. Dil'man</b> . . . . .	141	113
Study on the creep buckling of a rectangular cross-section beam. <b>K. I. Romanov</b> . . . . .	152	122
Dynamics of bridge and track structures under the action of the railway moving load. <b>I. I. Ivanchenko</b> . . . . .	158	127
A method for solving eigenvalue problems for complex linear systems. <b>V. N. Voronkov</b> . . . . .	178	141
