MECHANICS OF SOLIDS

	Russian page	English page
Magnetic suspension in an alternating current field. M. S. Artem'eva and D. Yu. Skubov . . .	3	1
Regular integral equations for the second boundary value problem in two-dimensional anisotropic elasticity. Yu. A. Bogan	17	13
The influence of the scale factor on the elastic moduli of a 3D nanocrystal. O. S. Loboda and A. M. Krivtsov	27	20
Elastic properties of graphite rods and multiwalled carbon nanotubes (torsion and extension). V. A. Gorodtsov and D. S. Lisovenko	42	33
Discrete-continuous model of a nanotube. R. V. Goldstein and A. V. Chentsov	57	45
Determination of elastic moduli of nanostructures: theoretical estimates and experimental techniques. E. A. Ivanova, N. F. Morozov, B. N. Semenov, and A. D. Firsova	75	60
Submicrosecond strength of materials. G. I. Kanel, S. V. Razorenov, and V. E. Fortov	86	69
The Effect of rheological fracture elements in modeling wave motions in a rod of complex structure. D. A. Indeitsev, V. N. Naumov, and E. I. Prokuratova	112	90
Evolutionary constitutive relations for finite viscoelastic strains. R. S. Novokshanov and A. A. Rogovoi	122	98
Plastic instability of thin-walled cylindrical shells. V. L. Dil'man	141	113
Study on the creep buckling of a rectangular cross-section beam. K. I. Romanov	152	122
Dynamics of bridge and track structures under the action of the railway moving load. I. I. Ivanchenko	158	127
A method for solving eigenvalue problems for complex linear systems. V. N. Voronkov	178	141
