## MECHANICS OF SOLIDS

|  | Russian<br>page | English<br>page |
|--|-----------------|-----------------|
| A strapdown inertial system of minimum dimension (A 3D oscillator as a complete inertial sensor). <b>V. Ph. Zhuravlev</b> .....  | 5               | 1               |
| Description of regular precessions of a gyrostat in a potential force field. <b>M. I. Dzhioeva</b> ...   | 11              | 6               |
| Perturbed Earth rotation. <b>L. D. Akulenko, S. A. Kumakshev, and Yu. G. Markov</b> .....  | 19              | 12              |
| Plane and axisymmetric contact problems for a three-layer elastic half-space.<br><b>V. M. Alexandrov and A. A. Kalyakin</b> .....                                      | 30              | 20              |
| Approximate solution of the axisymmetric hertz problem allowing for tangential displacements on the contact surface. <b>I. I. Argatov</b> .....                        | 39              | 27              |
| Stress state in an elastic space due to phase transformations in an inclusion.<br><b>R. V. Goldstein and E. I. Shifrin</b> .....                                       | 48              | 34              |
| High-frequency scattering by an arbitrary nonconvex boundary surface of an elastic body in view of multiple reflections. <b>N. V. Boev</b> .....                       | 65              | 48              |
| Nonstationary vibrations of a system of two eccentric spherical shells with an acoustic filler.<br><b>A. G. Gorshkov, D. V. Tarlakovskii, and A. M. Shukurov</b> ..... | 81              | 60              |
| The far field of a Rayleigh wave in an elastic half-strip under end loads.<br><b>V. A. Kovalev, L. Yu. Kossovich, and O. V. Taranov</b> .....                          | 89              | 66              |
| Impact of flat and axisymmetric strikers against a rigid fixed obstacle.<br><b>V. A. Andrushchenko, V. A. Goloveshkin, V. V. Zuev, and N. N. Kholin</b> .....          | 97              | 73              |
| A new method for measuring creep damage in metals. <b>A. M. Lokoshchenko</b> .....   | 108             | 82              |
| Generalized forces in creep estimates for standard structural members.<br><b>I. V. Lyubashevskaya and O. V. Sosnin</b> .....   | 123             | 93              |
| On the ultimate statically determinate relations in the theory of compressible perfectly plastic media. <b>D. D. Ivlev</b> .....                                       | 131             | 99              |
| On the statically determinate relations in the general 2D perfect plasticity problem.<br><b>B. G. Mironov</b> .....  | 135             | 102             |
| On the relations for isotropic perfectly plastic solids. <b>L. A. Maksimova</b> .....  | 141             | 107             |
| Pressure of a flat round die on a perfectly plastic half-space with allowance for contact friction. <b>R. I. Nepershin</b> .....                                       | 150             | 115             |
| Indentation of a rigid pyramid into a perfectly plastic half-space.<br><b>A. V. Gorskii and P. V. Gorskii</b> .....  | 159             | 122             |
| Transformations of the Prandtl solution under the action of a symmetry group. <b>S. I. Senashov</b>  | 167             | 129             |
| On the stressed state under plastic strain near surfaces with edges. <b>M. Ya. Brovman</b> .....   | 172             | 134             |
| Nonstationary diffraction of a plane acoustic pressure wave by a thin elliptic shell.<br><b>L. N. Rabinskii</b> .....  | 184             | 144             |
| The 75th birthday of Professor D. D. Ivlev. ....   | 3               | 151             |
