## MECHANICS OF SOLIDS

	Russian page	English page
Saint-Venant plastic flows with weakly inhomogeneous yield strength. <b>D. A. Georgievskaya and D. V. Georgievskii</b> .....	11	1
Elastoplastic equations with exact consistency of strains for the elastic strain frame and the velocities of points. <b>I. A. Solomeshch and M. A. Solomeshch</b> .....	26	13
On the nonlinear theory of viscoelasticity. <b>V. V. Vakulyuk and B. E. Pobedrya</b> .....	49	30
Some features of the application of the upper bound theorem to viscous materials. <b>S. E. Aleksandrov and R. V. Goldstein</b> .....	56	36
Structure-energy analysis of a uniaxial stressed state under compression and unloading of a viscoelastic material. <b>V. E. Apet'yan and D. L. Bykov</b> .....	63	42
Radial stress distribution in an inhomogeneous viscoelastic half-plane. <b>M. N. M. Allam</b> .....	77	53
Plastic flow state and evolution of crystallographic texture in a metal plate. <b>F. F. Satdarova</b> .....	85	60
Rheological instability and localization of strains in plane elastoplastic specimens under extension. <b>V. N. Kukudzhinov and A. L. Levitin</b> .....	97	69
Linearized neutral equilibrium equations for nontin sandwich shells with transversely soft filler and related problems of nonlinear elasticity. <b>V. A. Ivanov, V. N. Paimushin, and V. I. Shalashilin</b> .....	111	81
Peculiarities of temperature resistance of layered composites. <b>A. M. Simonyan and Yu. G. Sanoyan</b> .....	130	95
On an approach to the construction of engineering theory of inhomogeneous anisotropic beams. <b>V. I. Gorbachev and O. Yu. Tolstykh</b> .....	137	101
A version of the theory of multilayer curvilinear rods. <b>M. U. Nikabadze</b> .....	145	107
On the dynamics of the Thompson top (tippe top) on the plane with real dry friction. <b>V. Ph. Zhuravlev and D. M. Klimov</b> .....	157	117
Modeling the motion of bodies connected by friction joints. <b>A. P. Leutin</b> .....	169	128
Reliability in Science and Life (The 95th anniversary of A.A. Il'yushin's birth). <b>E. A. Il'yushina</b> .....	3	143
Author index .....	188	149
Volume contents .....		154
