## RADIOELECTRONICS AND COMMUNICATIONS SYSTEMS

	PAGES	
	RUSSIAN	ENGLISH
The input impedance of an arbitrarily oriented electric dipole located over a rectangular screen. Part 2 — The calculation results. N. P. Yeliseyeva . . . . .	3	1
A rectangular resonator with its characteristics controlled by magnetic field. D. A. Usanov and S. S. Gorbatov . . . . .	7	5
Identification of the fuzzy model of an object with multiple structure. A. V. Yeliseyev . . . . .	14	10
Synthesis of algorithms for multialternative recognition of patterns set by complex standard descriptions, given a class of unknown objects. G. V. Pevtsov and D. A. Kolisnichenko . . . . .	27	19
Game-theoretic estimation of traffic capacity of systems with parallel preemphasis of signals. V. K. Marigodov and Yu. V. Matveyev . . . . .	32	23
Algorithms for improving radar resolving capacity in surface surveillance. V. K. Klochko . . . . .	40	29
The impact of turbulent atmosphere on detection characteristics of a radar system with MTI. A. V. Kiselyov and M. A. Stepanov . . . . .	46	33
The time delay lines in the $J$ -correlation method of direction finding. A. G. Sorochan . . . . .	51	37
Segmentation of TV images in the problem of objects' coordinate determination. Yu. V. Martyshevskii . . . . .	54	39
A parallel linearly constrained fast RLS-algorithm based on inverse QR-decomposition without square root operations. V. I. Dzhigan . . . . .	61	45
Index . . . . .	71	
Author index . . . . .	78
