2006

RUSSIAN ELECTRICAL ENGINEERING

	PAGES	
	RUSSIAN	ENGLISH
Electrodynamics separators with a rotating magnetic field. A. Yu. Konyaev, I. A. Konyaev, and K. V. Kuznetsov.....	10	1
Three-phase linear-induction magnetohydrodynamic pump. S. F. Sarapulov and B. A. Sokunov.....	16	7
Pulsed linear electric motors. D. N. Tomashevskii and A. N. Koshkin.....	24	13
Models of a resistance furnace and linearization of the control channel in the temperature-regulation system. V. A. Ivanushkin, F. N. Sarapulov, and S. M. Mezenin.....	28	20
Simulation of the power regulator of an arc furnace with a controllable insensitivity zone. V. A. Ivanushkin, V. N. Kozheurov, and F. N. Sarapulov.....	33	26
Simulation of an asynchronous frequency-controlled drive when recuperating braking energy to the grid. V. S. Kopyrin and A. A. Tkachuk.....	37	30
Combined multifunctional brushless exciter for independent-excitation systems of synchronous machines. A. T. Plastun, V. I. Denisenko, A. N. Moiseichenkov, Yu. N. Radchenko, M. M. Ryabov, and V. A. Chernyshev.....	45	39
Dynamic calculation of a linear induction motor using FEMLAB software. E. V. Zhivoglyadov and I. V. Chernykh.....	52	46
Improving the output voltage of a three-level inverter by pulsewidth modulation with the removal of selected harmonics. A. D. Levin, G. V. Radkovskii, Yu. N. Radchenko, V. M. Lipanov, and V. F. Shut'ko.....	57	53
