JOURNAL OF SUPERHARD MATERIALS

PAGES
RUSSIAN/ENGLISH

Production, Structure, Properties

The effect of a thermocyclic treatment of tungsten carbide hard alloys on their structures and properties. Part 1. L. I. Aleksandrova, B. P. Bondarenko, T. V. Nayuk, and N. A. Yurchuk.	3	1
Interaction of a chlorinated synthetic diamond surface with c-nucleophiles. V. V. Korolkov, B. N. Tarasevich, I. I. Kulakova, G. V. Lisichkin.	12	9
Up-to-date commercial production technology for detonation nanodiamonds and their main applications. Report 1. V. Yu. Dolmatov.	18	16
Wettability features of nanocluster coatings. L. Yu. Ostrovskaya.	30	28
Kinetic analysis of reactions of hydrogen reduction of WO ₃ in a closed-type reactor. V. P. Bondarenko and I. V. Andreev.	43	41
Multilayer antireflection interference coatings with protective diamond-like films for wavelength range 8 to 12 μm. S. P. Staryk, O. G. Gontar, B. A. Gorshtein, V. Yu. Gorokhov, S. M. Dub, and O. M. Kutsay.	52	49

Investigation of Machining Processes

Sapphire and ruby (α -Al ₂ O ₃) tools for edge-cutting machining of scintillation materials. V. V. Rogov, A. Ya. Dan'ko, V. G. Senchishin, and A. Yu. Boyarintsev.	59	57
Theoretical analysis of tool wear in finishing natural and artificial stone. V. I. Sidorko.	64	62

Tools, Powders, Pastes

Numerical analysis of the effect of the fabrication assembly design and heating conditions on the temperature in a working layer during its bonding to a drill bit body. V. A. Dutka, V. P. Pereyaslov, S. A. Ivanov, and L. M. Bologova.	72	69
Conditions for providing the required grit inclination in the abrasive layer of an extruded wheel. M. A. Grigoryan and T. G. Afrikyan.	84	81
