JOURNAL OF SUPERHARD MATERIALS

PAGES
RUSSIAN/ENGLISH

Production, Structure, Properties

Synthesis of superhard composites in the B—C system. V. L. Solozhenko, O. O. Kurakevych, N. A. Dubrovinskaya, and L. S. Dubrovinsky.	3	1
Features of carbon condensation in a detonation wave and the conditions for optimal synthesis of nanodiamonds. V. V. Danilenko.	9	7
New simple forms of synthetic diamond single crystals. V. V. Lysakovsky, M. A. Serga, V. N. Kvasnitsa, and S. A. Ivakhnenko.	25	23
Structure and properties of superhard materials based on boride pseudobinary systems produced by the zone melting method. P. I. Loboda, Yu. I. Bogomol, M. O. Sysoev, and G. P. Kysla.	30	28
A study of combined reduction-carbidization of tungsten from WO ₃ in methane-hydrogen atmosphere without use of graphite. V. P. Bondarenko, A. A. Matveichuk, I. V. Savchuk, A. N. Vashchenko, and T. V. Gomelyako.	35	33
Composition and properties of dispersed silicon carbide produced from rice husks. V. G. Lutsenko.	48	45
High-strength and wear-resistant eutectic composites. V. E. Semenenko, A. S. Posukhov, and N. N. Pilipenko.	60	57

Investigation of Machining Processes

Characteristics of the interacting diamond dressing roller and grinding wheel reliefs. M. A. Grigoryan.	66	63
---	----	----

Tools, Powders, Pastes

Quality assessment of superabrasive powders. Part 1. Theoretical basis of the method for assessment of quality characteristics. N. V. Novikov, G. F. Nevstruev, G. D. Il'nitskaya, V. I. Kushch, and V. N. Kolodnitskiy.	74	71
