

# SIBERIAN ADVANCES IN MATHEMATICS

---

Volume 16

Number 3

2006

---

## CONTENTS

### **P. Chen, S. H. Sung, and A. I. Volodin**

*Rate of Complete Convergence for Arrays of Banach Space Valued  
Random Elements* ..... 1

### **V. V. Chistyakov**

*A Pointwise Selection Principle for Functions of a Single Variable  
with Values in a Uniform Space* ..... 15

### **I. G. Ganiev and K. K. Kudaybergenov**

*The Banach-Steinhaus Uniform Boundedness Principle for  
Operators in Banach-Kantorovich Spaces over  $L^0$*  ..... 42

### **A. V. Gavrilov**

*Algebraic Properties of Covariant Derivative and Composition of  
Exponential Maps* ..... 54

### **T. Hõim and D. A. Robbins**

*Section Spaces of Banach Bundles Which Generalize Some Function  
Spaces* ..... 71

### **I. R. Kayumov**

*Boundary Behavior of Analytic Riesz Products in the Disk* ..... 82

### **E. V. Nikitenko**

*Seven-Dimensional Homogeneous Einstein Manifolds of Negative  
Sectional Curvature* ..... 99

### **V. Yu. Popov**

*NP-Completeness of the Dictionary Generation Problem* ..... 115
