JOURNAL OF WATER CHEMISTRY AND TECHNOLOGY

PAGES
RUSSIAN/ENGLISH

Physical Chemistry of Water Treatment Processes

Production of sorbents modified by polyphosphates and their use in removing heavy metallic ions from waters. Yu. I. Tarasevich and G. M. Klimova.	107	1
Adsorption of emulsified oil from sea water. L. M. Soldatkina, A. N. Purich and B. M. Kats. ..	117	7

Analytical Chemistry of Water

Sorption-photometric determination of cationic SAS in water. S. A. Dolenko, O. A. Zaporozhets, V. V. Shevchenko and N. F. Kushcheevskaya.	125	13
Features of complexing in the Al(III) – H ₂ O – OH ⁻ – Cl(SO ₄ ²⁻) – flocculant system in the presence of the fat-containing disperse phase. T. Yu. Gumerov, G. G. Faizullina, A. F. Dobrynina and R. A. Yusupov.	134	19
Determination of hydrogen peroxide in water by quenching Eu(III) complex fluorescence. Yu. V. Skripinets, A. V. Egorova, V. P. Antonovich, and I. V. Ukrainets.	143	25

Water Treatment and Demineralization Technology

Compression separation of SAS from wastewaters. F. Yu. Ibadullaev.	152	31
Removal of U(VI) and Co(II) from polluted waters by the method of micelle-enhanced ultrafiltration. A. P. Krivoruchko and L. Yu. Orlova.	163	39

Natural Waters

Ecological safety problems of shelf waters of the Black and the Azov seas. V. V. Goncharuk, G. A. Belyavskii, N. I. Kovalyov, and V. A. Gokh.	172	45
Water treatment problems associated with changes in the composition of groundwaters during operation of water intake systems (as exemplified by the south of Tomsk region). O. D. Lukashevich.	196	58
