JOURNAL OF WATER CHEMISTRY AND TECHNOLOGY

PAGES
RUSSIAN/ENGLISH

Physical Chemistry of Water Treatment Processes

Electron structure of the ozone molecule and reactivity of ozone. Yu. I. Gorlov and V. V. Goncharuk.	211	1
Na ⁺ – Ca ²⁺ exchange on polyacrylic cation exchangers. A. V. Mamchenko, D. V. Semenyuk, I. M. Kosygina, and T. I. Yakimova.	222	8
Molecular-impregnated polymer membranes: state of the art and prospects. V. M. Kochkodan.	232	15

Analytical Chemistry of Water

Methods for removing nitrates from natural and drinking waters. O. S. Iyevleva and V. V. Goncharuk.	256	30
Extraction-potentiometric determination of phenols in water media. Ya. I. Korenman, L. A. Kharitonova, A. V. Nikulina, N. V. Sonina and G. S. Zagorodnikh.	274	40
Heterogenous-chemiluminescent determination of trace amounts of germanium using cationic SAS. O. V. Zuy.	280	44

Water Treatment and Demineralization Technology

Using copper ions for disinfection of wastewaters from stock-breeding complexes. I. I. Lishtvan, E. V. Gapanovich and V. M. Kraiko.	289	50
--	-----	----

Biological Methods of Water Treatment

The potentiometric bacterial biosensor for determination of heavy metals in water. T. G. Gruzina, A. M. Zadorozhnaya, V. V. Vember and Z. R. Ulberg.	297	55
---	-----	----

Natural Waters

Ecological aspects for the choice of desalination technology of the Caspian Sea water at the thermal power plants. M. M. Agamaliev.	304	59
--	-----	----

Brief Communications

Impact of dissolved oxygen on the water magnetization effect. V. V. Goncharuk, V. A. Bagrii, R. D. Chebotareva and S. Yu. Bashtan.	311	63
---	-----	----
