JOURNAL OF WATER CHEMISTRY AND TECHNOLOGY

PAGES
RUSSIAN/ENGLISH

Physical Chemistry of Water Treatment Processes

- Adsorption of fulvic acid on kaolinite sorbents modified with polyoxycations of aluminum. V. V. Lukyanova, S. V. Bondarenko, Yu. I. Tarasevich, G. N. Malysh, and A. I. Zhukova. 415 1
- Ultrasound investigations of aqueous dispersions of polysaccharide flocculants. E. V. Datskevich and V. I. Shutova. 426 8

Analytical Chemistry of Water

- Atomic-absorption determination of lead in water with preconcentration on silica modified with sulfarsazene. O. A. Zaporozhets and N. V. Ishchenko. 436 14
- Enzymatic determination of phenols in water with the use of catalase and the vegetable extract of oxidases. O. Yu. Nadzhafova, M. V. Drozdov and Yu. M. Simonenko. 444 19
- Atomic-absorption determination of antimony in mine waters. A. S. Alemasova, N. V. Meshchaninova, and T. V. Zinchenko. 453 26

Water Treatment and Demineralization Technology

- Water softening in an electrolyzer with a ceramic membrane. V. V. Goncharuk, R. D. Chebotareva, V. A. Bagriy, S. Yu. Bashtan, and S. V. Remez. 460 31
- A complex reagent for natural water treatment. A. V. Mamchenko, I. I. Deshko, L. A. Bondar, N. A. Pavlova, and T. A. Pakhar. 471 38
- Specific features of combined bioregeneration of activated carbons under dynamic conditions. N. A. Klimenko, L. A. Savchina, Yu. V. Sidorenko, and T. L. Vrubel. 479 44
- Water purification of dyes with ceramic membranes modified with clay minerals. T. Yu. Dulneva and D. D. Kucheruk. 496 54

Biological Methods of Water Treatment

- Specific variety and number of invertebrates in biological treatment of wastewaters. L. I. Globa, P. Ya. Kilochitskii, D. V. Lukashev, A. V. Podobailo, V. V. Sukhoi, and L. A. Khrokailo. 505 60
